

setParameterScale

```
graph LR; A[setParameterScale] --> B[unscaleParameters]; B --> C[np];
```

A flowchart with three rectangular boxes connected by arrows. The first box, labeled 'setParameterScale', is shaded gray. A dark blue arrow points from its right side to the second box, labeled 'unscaleParameters', which is white. Another dark blue arrow points from the right side of the second box to the third box, labeled 'np', which is also white. All boxes have a black border.

unscaleParameters
